After a several month hiatus, the Price School’s Research News is back! This is the first issue produced by our new Contracts and Grants Manager, Meggy Frye. Meggy is your main contact for all things related to proposals and grants. She has experience in both “pre-award” and “post-award” contracts and grants management, so she brings an excellent skill set into our research office. Elizabeth Gatchalian, who did a wonderful job as interim C&G manager, continues to provide proposal support, as well as managing several faculty contract and grant accounts. Please join me in thanking Elizabeth for doing 1.5 jobs for several months with both grace and competence.

Gen Giuliano

INTRODUCTION

Please allow me to introduce myself. My name is Meggy Frye and I am your new Contracts and Grants Manager. I am very excited to be here and look forward to meeting and working with you all. Please do not hesitate to contact me for anything Contract and Grant related, and definitely let me know if you are planning to submit a proposal. I take great satisfaction in making the proposal process easier for you and my goal is to remove the administrative burden so you can spend your time on the truly important stuff. Here’s my contact information:

Meggy Frye  
Contracts & Grants Manager  
Sol Price School of Public Policy  
University of Southern California  
3434 South Grand Avenue, 130-11  
Los Angeles, CA 90089-2816  
Tel: +1 213.821.8175

UPDATE FROM THE VICE PRESIDENT OF RESEARCH

As many already know, USC is replacing its various administrative information systems. As part of this effort, the funded research information systems are also being changes. The memo below is from Randy Hall. Please take a look to learn about the changes coming online.

USC is in the midst of an ambitious initiative to replace and upgrade most of our enterprise-level administrative information systems in just a few years. TARA is part of this initiative.

TARA aims to: minimize data entry; expedite information exchange; reduce errors and mistakes; automate submission of documents and proposals; and provide visibility as to the status of proposals, reviews, and projects. TARA provides an integrated set of tools for pre-award and post-award management (principally provided by Kuali Coeus (KC) applications), as well as regulatory applications (such as animal research and conflict of interest, provided on the Click Commerce platform), and business intelligence tools (supported by Cognos). Our goal is for this “cradle to grave” system to simplify and improve research administration for faculty and staff across the university. A complete set of TARA functions can be found in the system requirements document (https://research.usc.edu/files/2011/06/RASRequirements_3_7_2011.pdf).
We update our implementation schedule and progress to date on TARA below.

- The first new element of TARA, diSClose, was made available to investigators in July to support disclosure of conflicts of interest in research. diSClose complements the iStar system, which has been available for several years to support human subjects research. More than 600 investigators have already used diSClose.

- The initial project plan called for the Post Award modules of KC to roll out last month. A variety of technical and other factors led us to delay the rollout until January 2013. The KC Post Award module supports the work of the Department of Contracts and Grants and Sponsored Projects Accounting, but will also provide great transparency to Principal Investigators and their staff. All non-financial records and transactions affecting an award (terms and conditions, reporting requirements, and so on) will be accessible by the appropriate individuals working on that project.

- Implementation of the Kuali Financial System (KFS) is reaching its conclusion. Most departments already use KFS for all purchasing transactions, and will soon move to KFS applications for reimbursements, other payments (subscriptions, honoraria, etc.) and budget changes. It is worth noting that USC is the first university to achieve a full integration of the KC and KFS software, allowing seamless movement and processing between the two systems.

- Financial Projections and Reporting (FiPS) is a new tool being developed at USC within the KC environment to help Principal Investigators and administrators plan the use of resources from multiple grants, incorporating both established funding and expenditure commitments, and potential funding and expenditure choices. FiPS is dependent on data from the Post Award system, so will roll out at roughly the same time. These modules will be available in January, 2013.

- Service Center Recharge will automate the billing for the university’s shared research facilities. This functionality will be provided through CORES, a software program developed at the Vanderbilt University Medical Center and configured for USC. Seven core labs are participating in the pilot, which will begin in production in November 2012. The timeline for bringing additional labs onto the CORES software will be developed in early 2013, with the aim for all core labs to be integrated by the summer of 2013.

- Business intelligence reporting will replace the current SCera reports, providing an array of new standard reports and giving faculty and others the ability to create custom reports drawing on information from multiple systems. The new reports will track the status of accounts, proposal and overall research activity, as well as track the speed of processes related to execution of agreements.

- The launch of Effort Certification and Payroll Expense Transfers are delayed pending the implementation of Workday, the new payroll and human capital management system. The new date for the Workday rollout has not yet been confirmed.

- In Regulatory Administration, programming continues to automate the internal review of conflicts of interest disclosures. Animal care and use (IACUC) was delayed due to departure of a key programmer, but is now close to completion, with an anticipated production date of January 2013. These systems will be integrated with Kuali Coeus when Post Award goes live in January. Additional elements for radiation safety and biological safety are expected in the summer of 2013. These will be integrated with the other regulatory components to minimize data re-entry and expedite reviews.

- The Pre-Award component of TARA will be the last to go into production, targeted for October 2013. Pre-Award supports the development of proposals, including budgets; routing for approval according to the business processes of the various schools; proposal review by the Office of Contracts and Grants; and submission to the sponsoring agencies.
UPCOMING SOLICITATIONS

For foundation or corporate giving opportunities, contact Megan Goulding at 213.821.8188 or mgouldin@usc.edu, and check back next month for a full list of upcoming foundation grant opportunities and deadlines.

1. The Haynes Foundation Major Research Grants due November 8, 2012

The John Randolph Haynes and Dora Haynes Foundation seeks applications and makes grants for research on major economic, social and political problems of the greater Los Angeles area. Preference is given to applied studies which, in addition to adding significantly to knowledge and understanding of issues, are judged to show promise of influencing policies and practices addressing these issues. The research project’s potential for publication and its use by the community are also taken into account. The Foundation is willing to consider requests for support in disseminating the results of the studies it funds. Major research projects concerning the history of Southern California will also be considered. Submissions are due on November 8th (applications must be dropped off with the receptionist in Al Checcio’s suite in Bovard – ADM 160 by 3:30pm on November 8). Full guidelines can be found on the Foundation’s website: http://www.haynesfoundation.org/program/index.asp

2. NIH R01

Title: Multidisciplinary Studies of HIV/AIDS and Aging (R01)

Description: The goal of this announcement is to invite research grant applications studying HIV infection, HIV-associated conditions, HIV treatment, and/or biobehavioral or social factors associated with HIV/AIDS in the context of aging and/or in older adults. Research approaches of interest include clinical translational, observational, and intervention studies in domestic and international settings

Funding number: PAR-12-175

Application Due Date: December 7, 2012

# of Awards/Funds Available: The number of awards is contingent upon NIH appropriations, and the submission of a sufficient number of meritorious applications. Application budgets are not limited, but need to reflect actual needs of the proposed project.

Announcement Link: http://grants.nih.gov/grants/guide/pa-files/PAR-12-175.html

3. NIH R01

Title: Time-Sensitive Obesity Policy and Program Evaluation (R01)

Description: This FOA is intended to encourage and support research in which a unique and time sensitive opportunity has arisen to collect baseline data and then prospectively assess effectiveness of an imminent policy or program designed to prevent or reduce obesity in a given population (e.g. designed to reduce energy intake, increase activity, or decrease sedentary behavior).

Funding Number: PAR-12-257
4. NIH R24

**Title:** Basic social and behavioral research on culture, health, and wellbeing (R24)

**Description:** This Funding Opportunity Announcement (FOA), issued on behalf of the NIH Basic Behavioral and Social Sciences Opportunity Network (OppNet), will provide grants for infrastructure support to develop, strengthen, and evaluate transdisciplinary approaches and methods for basic behavioral and/or social research on the relationships among cultural practices/beliefs, health, and wellbeing. This includes an appreciation for more comprehensive understandings of the relationships regarding cultural attitudes, beliefs, practices, and processes, on outcomes relevant to human health and wellbeing.

**Special Consideration:** This is NOT an electronic submission. Paper applications must be mailed to NIH no later than Friday, December 14th (for delivery Monday, December 17th).

**Funding number:** RFA-LM-12-002

**Due Date:** December 17th, 2012

5. USC Research and Creative Project Grants: Advancing Scholarship in the Humanities and Social Sciences

The primary goal of the Advancing Scholarship in the Humanities and Social Sciences (ASHSS) initiative is to support our most productive faculty at critical moments during the scholarly and creative process so that they are enabled to produce high-caliber work sooner.

The ASHSS research and creative grant program, an initiative of the Office of the Provost, promotes the development of innovative and influential scholarly and creative output in the arts, humanities, and humanistic social sciences. Grants of up to $25,000 will be made to faculty members in any academic unit of the University who seek to make important contributions in these fields.

All USC faculty – tenured, tenure-track, and non-tenure track – are eligible to apply. Visiting faculty are ineligible. However, preference will be given to newly promoted associate professors as an expression of the university's commitment to their careers, belief in their scholarly promise, and laudatory acknowledgment of having achieved tenure.

**Due Date:** January 22, 2013

**Announcement Link:** [http://fpd.usc.edu/ashss/ashss-research-grants/](http://fpd.usc.edu/ashss/ashss-research-grants/)
6. USC Research Collaboration Fund

The Research Collaboration Fund supports research collaboration among faculty and students working on interdisciplinary research topics, such as water, neuroscience, genomics, digital humanities, or climate change. Example uses of funding include organization of workshops, seminars, application of collaborative technologies, retreats and development of online resources. Each collaboration should engage a large group of faculty (normally 10 or more), representing at least two schools at USC. Funding can be for up to three years, with the possibility of competitive renewal thereafter.

The aim of these awards is not to fund specific research projects, but rather to support teams of faculty who aim to establish or foster a community of scholars at USC organized around a broad topic of shared interest. The awards fund the activities that help to develop this collaborative group. These activities should lay the groundwork for members of the collaborative group to create new research projects, and should contribute to strengthening the individual research programs of its members.

Awards under this program are made through a competitive process, based on proposals submitted by a lead faculty investigator along with at least one additional investigator holding a primary faculty appointment in a different school than the lead investigator.

Due Date: March 4, 2013

Announcement Link: http://research.usc.edu/for-investigators/funding/usc/collaboration/

UPCOMING RESEARCH EVENTS

Our Price intranet calendar has a full list of upcoming research seminars. Please see http://www.usc.edu/schools/price/intranet/calendar/index.html. Listed below are the seminars scheduled for the next two weeks.

The Role of Organizational Resources in Explaining Urban Inequality

Center on Philanthropy and Public Policy Fall 2012 Nonprofit Research Seminars

When: Monday, November 5, 2012 : 12:00pm to 1:30pm
Location: University Park Campus, Ralph and Goldy Lewis Hall (RGL), 308
Presenter: Joe Galaskiewicz, Professor of Sociology, University of Arizona
Lunch will be served. Please RSVP to cppp@usc.edu

Urban Tree Canopy and Asthma or Allergic Sensitization

Urban Growth Seminar

This year’s theme is Planning and Health: From Research to Practice, and is co-sponsored by the Price School of Public Policy and the Institute for Health Promotion and Disease Prevention Research in the USC Keck School of Medicine.

When: Tuesday, November 6, 2012 : 12:15pm to 1:30pm
Location: Health Sciences Campus, Harlyne Norris Research Tower, Aresty Conference Center, 4444
Judicial Nominations and Policy Outcomes: Tonja Jacobi, Northwestern University

Price Governance Salon

Tonja Jacobi, Professor of Law from Northwestern University joins us to discuss judicial nominations.
When: Thursday, November 8, 2012 : 12:00pm to 1:00pm
Location: University Park Campus, Ralph and Goldy Lewis Hall (RGL), 308
Sponsored By: Bedrosian Center, and USC Price School of Public Policy
Please RSVP to: bedrosian.center@usc.edu

Jacobi’s research focuses on judicial politics and behavior, federal courts, American governmental institutions and constitutional law, particularly constitutional criminal procedure. The driving question in her research is: how do judges respond to institutional constraints? This includes vertical constraints, such as the possibility of review by a higher court; horizontal constraints, such as how to craft a broad coalition on a multi-judge panel; as well as judicial role constraints, such as how can judges address an issue they are interested in if the parties have not argued that question before the court. She combines doctrinal, empirical and formal analysis to predict and analyze strategic judicial behavior in response to such constraints.

Parks for Health: Land and People

Urban Growth Seminar

When: Tuesday, November 13, 2012 : 12:15pm to 1:30pm
Location: University Park Campus, Ralph and Goldy Lewis Hall (RGL), 101
Speaker: Tori Kjer, Program Manager, Parks for People, The Trust for Public Land
Please visit urbangrowth.usc.edu or UGS on Facebook to keep up to date, and feel free to email our coordinator, Bianca Shulaker, shulaker@usc.edu with any questions.

Schaeffer Seminar: Dr. Lonny Reisman, MD

When: Tuesday, November 13, 2012 : 2:00pm to 3:30pm
Location: University Park Campus, University Gateway Building, Unit A

Intergovernmental Delegations: Pamela J. Clouser McCann, Evans School of Public Affairs, University of Washington

Price Governance Salon

Pamela J Clouser McCann, Assistant Professor of Public Affairs from the University of Washington, joins us to discuss intergovernmental delegation.
When: Thursday, November 15, 2012 : 12:00pm to 1:00pm
McCann's research focuses on the intersection between congressional behavior, bureaucratic delegation, federalism, and public policy. She explores the influence of the states and state political institutions on national political maneuvering and policy choices. In particular, she examines the influence of policy actors’ intergovernmental context on legislative choices. Her current work considers the impact of the interaction of state and national political institutions on political choices and policy outcomes.

PROPOSAL ACTIVITY

As Gen mentioned above, Elizabeth assisted the faculty in submitting 48 proposals totaling $17.5 million in since the last Research News.

And good luck to those who submitted a proposal in October!
